Anderson Cash Grocery Co.

A Case of Veracity.

It was a Scotch convivial gathering and every one had contributed to the entertainment save a certain medico. "Come, come, doctor," said the chairman, but the doctor protested. "My voice resembles the sound caused by the act of rubbing a brick along the panels of a door." The company attributed this to the doctor's modesty. "Very well," said he finally, "if you can stand it I am willing." There was a painful silence as the doctor sat down, broken at length by the voice of a brave Scot at the end of the table. "Men," he exclaimed, "your singing's not up to much, but your veracity is just awful. You're right about that brick."

ELECTRIC CITY SPARKLETS

Items of Interest and Personal Mention Caught Over the Wireless on the Streets of Anderson

Mr. Geo. H. Bailes Returned Home.

Mr. George H. Bailes has returned to the city after spending several days in the upper eastern section of this State and in parts of North Carolina. He says that the crops are looking well every where that he has been and that business is good, but in no place better than it is here in Anderson.

Mr. G. L. Sadler Joins Anderson Hardware Company.

Mr. G. L. Sadler, who has been in the plumbing business here in Anderson with the Plumbing and Heating company, has sold his stock to the

Anderson Hardware company and hereafter will be associated with them in business.

Heavy Wind Storm Yesterday Afternoon.

Yesterday afternoon about 2 o'clock the city was visited by a rather heavy wind storm that caused much dust. One of the windows in front of Moore & Wilson's store was broken by the wind and for a time it seemed that the storm would be rather severe. It was reported that a hail storm visited that section around Sandy Springs and that a good deal of damage was done to the crops.

LEMBERG IN OBJECT OF AUSTRO-GERMANS

(CONTINUED FROM PAGE ONE.)

buildings and sinking many Turkish vessels.

Great German Victory. London, June 15.—Germany on Monday claimed another decided success along the eastern line. North-west of Minsk, in the region of Sienawa, the German report said that along a line extending over 43 miles the entire positions of the Russians were taken and that 16,000 prisoners fell into their hands. The Russian official report, however, only mentioned the locality where this action is said to have taken place in a paragraph, declaring the Austro-Germans, after heavy losses in the region of Minsk Friday and Saturday did not resume the offensive.

No Important Developments. London, June 15.—Although the German war office claims to have recaptured some of the lost positions north of Arras, no mention of reverses was made in today's communication from the French war office. It said there had been no important developments.

ENGLAND WILL PAY FOR COTTON

(CONTINUED FROM PAGE ONE.)

cotton valued at twelve million dollars. Banks and trust companies here discounted drafts against these shipments, as they were due soon, and anxiety has been felt over possible losses from England's delay to pay for the cotton. Most of the cotton was consigned to Holland, Sweden and Denmark. British orders in council ordered it to be sold in England and at contract prices.

S. C. BAPTIST ASSEMBLY TO MEET IN GREENVILLE

Greenville, June 15.—The program for the first annual session of the South Carolina Baptist assembly and Bible conference has been issued by the Baptist Courier press. The meeting will be held at Furman University from July 9 to 16. The personnel of the program contains many of the most eminent Baptist divines and Sunday school workers of the Southern States. This meeting will no doubt mean much to Greenville in many ways.

HEAD OF GASOLINE ENGINE CO. OBJECTS TO MAKING MUNITIONS

London, June 15.—W. R. Moore, head of the large gasoline engine manufacturing company, "Patterson, Limited," has resigned from all connection with the firm because the directors voted to place their plant at the disposal of the government for the manufacture of munitions. Mr. Moore's letter of resignation says: "Deep religious convictions will not allow me willingly to take part in the manufacture of munitions and I should not have become associated with the company had I thought that such a contingency would arise. As it has arisen there is one course open to me, and I resign therefore my position as chairman and director of the company."

MINERS GRANTED INCREASE ENGLISH COAL GOES UP

London, June 15.—The 15-12 per cent war bonus granted by the board of arbitration to the English coal miners has now gone into effect. On the same day, the mine owners announced an advance of 75 cents a ton in the price of coal at the mines. The price of coal is now about \$2.50 a ton above the price asked twelve months ago.

London Police to Have Respirators. London, June 15.—All police stations in London have been equipped with respirators, which will be issued out to patrolmen and special constables as a protection against gas bombs in case of a Zeppelin raid on the metropolis.

Plate Glass Broke. Yesterday morning when the three Evans boys, better known as the three Owls, went to open their pharmacy for the day, they discovered that one of the large plate glasses in front of the store had been broken. An electric sign which was suspended in front of the store had fallen and had struck the glass.

New Dentist. Dr. Carl Sanders, who has graduated in the department of dentistry at the University of Maryland, Baltimore, has arrived in Anderson and will be connected with his brother, Dr. J. C. Sanders, who has an office in the Bleckley building.

COMB SAGE TEA IN HAIR TO DARKEN IT

It's Grandmother's Recipe to Keep Her Locks Rark, Glossy, Thick.

The old-time mixture of Sage Tea and Sulphur for darkening gray, streaked and faded hair is grandmother's treatment, and folks are again using it to keep their hair a good, even color, which is quite sensible, as we are living in an age when a youthful appearance is of the greatest advantage.

Nowadays, though, we don't have the troublesome task of gathering the sage and the mossy mixing at home. All drug stores sell the ready-to-use product called "Wyeth's Sage and Sulphur Compound" for about 50 cents a bottle. It is very popular because nobody can discover it has been applied. Simply moisten your comb or a soft brush with it and draw this through your hair, taking one small strand at a time; by morning the gray hair disappears, but what delights the ladies with Wyeth's Sage and Sulphur is that, besides beautifully darkening the hair after a few applications, it also produces that soft luster and appearance of abundance which is so attractive; besides, prevents dandruff, itching scalp and falling hair.

What Fat Women Should Not Wear.

In the Fashion department of the June Woman's Home Companion appears the following "Dress Don'ts" for stout women:

"Don't be inveigled into wearing the too-short skirt; three inches from the floor is a good conservative length. 'Don't adhere too strictly to fashion's latest whims—pass the choker collar, for instance."

"Don't let the smart deep-yoked skirt tempt you if it's the slender hip you want."

"Don't set your heart on having one of your summer dresses of the rough-surfaced tussah silks that come in the fascinating sand and ceru shades. These fabrics and these shades are not for you."

"Don't adopt the long tight sleeve, even if it is the mode of the moment. The tight transparent sleeve brings out too prominently the shape of a big fat arm. The sausage effect should be avoided."

"Don't allow yourself to take kindly to the 'bobbed hair dressing; the forehead band; the too tight collure, and 'too too small hat. It will be a sorry day for you if you allow yourself to be tempted."

Just Suppose.

(Louisville Courier-Journal.)

The Ford Motor company has increased its capital stock from \$2,000,000 to \$100,000,000 and declared a stock dividend of \$48,000,000 payable July 1. (A Detroit dispatch.)

The conversion of manufacturing plants for the production of cannon might occur in America if this country should become seriously involved with a European power. What is more probable that Henry Ford, fired by patriotism, would begin to turn out highly effective guns—at \$9.40 each—in quantities undreamed of by the Krupps. They would be rough looking, rusty looking guns, perhaps, but would get there just the same. The enemy, not suspecting their efficiency, could march up close and be mowed down. It would cost so little to fire them that America's ammunition bill would be a mere trifle in comparison with that of the enemy, using types of cannon comparable to the large, handsome \$5,000 automobiles of the period. America would have the additional advantage of having a cannon for every military unit, a handy little destroyer of regiments which need not be mounted upon a gun carriage, but might be pulled about with a dog chain. Service stations at which parts of "used" cannon could be supplied by the dozen, gross, bush or ton, would be prepared to overhaul and refit our artiller y and a continuous plunging away at the enemy would be possible.

There is a great deal of loose talk about unpreparedness, which overlooks the fact that the Yankee manufacturer's efficiency is world-famous and that between the Atlantic and Pacific lie inexhaustible supplies of the raw material for fighting machinery. In that we have materials, ingenuity, system, enterprise "measureless to man," we are in a sense prepared to meet any emergency. Let us pluck up our courage. Let us not talk dolefully about having no Essen and no Krupps.

Never Make Important Decisions at Night.

In the June Woman's Home Companion appears an article entitled: "The Man Who Wanted to Die." It is the story of a young man, twenty-four years of age, who suffered from such physical and nervous depression that he could not accomplish anything. He was unable to find out what ailed him until he fell into the hands of a wonderful physician who discovered that he was suffering from auto-intoxication. The doctor put him on a diet and arranged his exercise and rules of living with the result that in time he got into good condition. On the subject of making important decisions at night the doctor suggested that he adopt the following rule:

"Never think about anything very important after six o'clock; and never make a decision at night."

"You are a different man in the morning from what you are at night. Every man is. You leap with a bound in the morning over difficulties that at night are insurmountable. You'll find your outlook on life ever so much brighter if you make all your important decisions before noon."
